Continue
Kilimanjaro is a mountain in Tanzania and Kenya. It is the highest peak in Africa and the highest free-standing mountain in the world. Kilimanjaro is located in northeastern Tanzania, close to the border with Kenya. The mountain is the highest point of not only Tanzania but also of the continent of Africa. It is a popular destination for trekkers from around the world who attempt to climb it for its stunning views and challenging peaks.

Kilimanjaro is made up of three main peaks: Mawenzi, Kibo, and Shira. Mawenzi is the highest of these, and stands at 5,149 meters (16,893 ft). Kibo is the highest peak overall, reaching 5,895 meters (19,341 ft) and is the highest point in Africa. Shira stands at 4,321 meters (14,162 ft).

Kilimanjaro is part of the eastern branch of the African volcanic arc. It is the highest mountain in the country and the highest free-standing mountain in the world. The mountain is one of the world's great natural wonders and is a popular destination for trekkers from around the world who attempt to climb it for its stunning views and challenging peaks.

Kilimanjaro is surrounded by a number of national parks, including Kilimanjaro National Park, the area that surrounds the mountain, and the Serengeti National Park to the south.

The mountain is the highest point of not only Tanzania but also of the continent of Africa. It is a popular destination for trekkers from around the world who attempt to climb it for its stunning views and challenging peaks.

Due to its popularity as a destination, the Tanzanian and Kenyan governments have invested in road infrastructure to improve accessibility to Kilimanjaro National Park. In Tanzania, Kilimanjaro International Airport also serves as an important transportation hub for the mountain.

In popular culture, Kilimanjaro is often depicted as a symbol of adventure and exploration. In literature, the mountain has been featured in a number of novels and poems, including Robert Louis Stevenson's The Strange Case of Dr. Jekyll and Mr. Hyde.

Kilimanjaro's highest point is the summit, which is marked by a sign that reads "Uhuru Peak," meaning "Freedom Peak" in Swahili. The summit can be reached by a number of hiking routes, including the Marangu Route, the Machame Route, the Rongai Route, and the Shira Route.

Kilimanjaro's weather is divided into two seasons: the dry season and the wet season. The dry season lasts from June to September, while the wet season lasts from October to May. The wet season is characterized by heavy rainfall, while the dry season is drier.

Kilimanjaro's flora and fauna are diverse, with a variety of plants and animals found on the mountain. The cloud forest, which is found on the Marangu Route, is home to a number of species of birds and insects. The semi-desert environment on the Crater rim is home to a variety of animals, including lions, leopards, and elephants.

Kilimanjaro has a long history of human interaction. The earliest known human activities on the mountain date back to the Old Stone Age, with evidence of early human settlement found in the area.

Kilimanjaro is also known for its role in the history of the region. The mountain has been a symbol of the peoples of the region, and has been featured in a number of cultural and historical works.
